

GUGULOTHU AKHIL KUMAR

AI & Full-Stack Engineer

Hyderabad, India | +91 70754 00204 | enigmasrealm77@gmail.com | [linkedin.com/in/akhil-kumar9](https://www.linkedin.com/in/akhil-kumar9) | github.com/LaZy-Wolf

SUMMARY

AI & Full-Stack Engineer with 10+ months of experience shipping production GenAI applications. Skilled in Large Language Model (LLM) integration, agentic systems (LangGraph, LangChain, Model Context Protocol), Retrieval-Augmented Generation (RAG), real-time voice AI and full-stack development with Python, FastAPI, TypeScript, Next.js and React. Proven record of taking AI features from prototype to scalable, production-grade deployments.

EXPERIENCE

GenAI Full-Stack Engineer Intern

Nov 2025 – Present

Allcognix AI · Remote (India)

- Built and shipped 4+ production AI products end-to-end across sales automation, automated software QA, financial operations and an AI-native CRM, consolidating manual multi-tool workflows into single AI-driven platforms.
- Deliver full-stack features that integrate LLMs into FastAPI backends and React/Next.js frontends, using PostgreSQL for persistence and Redis for caching.
- Design LLM-powered agentic workflows with LangGraph/LangChain that automate enterprise operations and cut manual effort.
- Collaborate in an agile team to take AI features from prototype to reliable, scalable production deployments.

EDUCATION

B.Tech, Computer Science and Engineering (Artificial Intelligence & Machine Learning)

2022 – Jun 2026

Malla Reddy University, Hyderabad · CGPA: 8.6 / 10.0 · Coursework: Artificial Intelligence, Machine Learning, Deep Learning, Cloud Computing

TECHNICAL SKILLS

Programming: Python, TypeScript, JavaScript, SQL

AI / LLMs: LLM Application Development, Agentic AI, RAG, LangGraph, LangChain, Model Context Protocol (MCP), Tool / Function Calling, Prompt Engineering, Multimodal AI, NLP, Model Deployment

Voice / Real-Time AI: Whisper (Speech-to-Text), Text-to-Speech, Voice Activity Detection, LiveKit Agents, WebRTC

Data / ML: Pandas, NumPy, scikit-learn, OpenCV

Backend: FastAPI, Flask, Django, Node.js, REST APIs

Frontend: Next.js, React.js, Tailwind CSS, HTML, CSS

Databases: PostgreSQL, MySQL, MongoDB, Redis, SQLite, Vector Databases

Cloud / DevOps: AWS (Lambda, S3), Docker, Serverless Framework, Git

PROJECTS

SONAR: Real-Time Voice Agent with MCP Tool Use — github.com/LaZy-Wolf/Sonar-Voice-Agent

Sep 2026 – Present

- Building an interruptible, real-time voice agent on LiveKit Agents and WebRTC: Silero VAD, semantic turn detection, Groq Whisper STT with a local faster-whisper fallback, a Groq → Gemini LLM fallback chain and Kokoro TTS on CPU, designed for sub-1.2 s time-to-first-audio on a laptop with no GPU.
- Exposing customer lookup, lead capture and site-visit booking as agent-callable actions through a custom MCP server (FastMCP, SQLite), and instrumenting every pipeline stage (VAD, STT, LLM time-to-first-token, TTS) to publish a measured p50/p95 latency budget on \$0 infrastructure.

ASOC: Agentic RAG Platform with MCP Integration — [GitHub](https://github.com)

- Architected a production-grade RAG pipeline with vector-database retrieval, embeddings, semantic chunking, hybrid search (keyword + vector), reranking, query routing and fallback handling for reliable, grounded responses.
- Orchestrated a LangGraph multi-agent workflow with explicit state machines, checkpointing and human-in-the-loop control, exposing enterprise tools as agent-callable actions through a Claude-compatible MCP server.

LUMINA: AI-Powered Misinformation Detection Platform — [GitHub](https://github.com)

- Built a multimodal misinformation-detection platform with LangGraph, LangChain and FastAPI that analyzes text, images, video, URLs and social posts, reaching 95% classification accuracy with Gemini Pro Vision and Groq.
- Engineered batch fact-checking, bias detection and neutral news summarization, and deployed the app as a scalable, provider-agnostic AI pipeline.

Additional Projects: ClearCue – AI skincare consultation app (Next.js 14, TypeScript, Gemini) with personalized skin analysis, treatment plans and PDF reports · AK-9 Voice Assistant (Porcupine wake-word, Whisper STT, Gemini) · Serverless Email API (Cloud Functions, Serverless Framework, Next.js).

ACHIEVEMENTS & CERTIFICATIONS

- 2nd Prize, National Hackathon, Malla Reddy University (GenAI chatbot); Second-Round Qualifier, Google GRID Hackathon; Bolt AI Hackathon.
- Certifications: Google Cloud Computing (GDSC, 2024); Programming in Java (NPTEL, 2024).
